

The image features a mosaic background of small, dark green and black tiles. In the center, there is a circular, glowing area containing a detailed mosaic of a green plant with long, thin leaves and small yellow flowers. The plant appears to be floating in water, with splashes and bubbles around its base. The overall color palette is dominated by various shades of green and blue, with white highlights from the water splashes.

THE **WATER GLASS**™
MOSAIC COLLECTION

SICIS
THE ART FACTORY

The background of the entire image is a close-up, top-down view of clear blue water. The surface is covered in intricate, organic patterns of light and dark blue, created by the reflection and refraction of light as it moves across the water's surface. These patterns resemble marbled paper or a complex, flowing texture.

WaterGLASS™
MOSAIC COLLECTION

SKY

Page 8

WaterGlass, liquidi riflessi

Parola d'ordine trasparenza. E l'effetto, vedendole, è proprio quello della cristallina consistenza, lucentezza e chiarezza dell'acqua. Non importa il colore, possono essere rosse come rubino, verdi come smeraldo, gialle come topazio: qualità primaria resta sempre la trasparenza, e quell'aspetto di pietra preziosa da far passare 'a manciate' tra le dita della mano: sono le tessere multicolore della collezione WaterGlass che, in infiniti accostamenti e decori, permettono di costruire ambienti attraversati dalla luce e dal liquido riflesso cui s'ispira l'intera collezione.

Un mosaico che può vestire d'acqua intere architetture...

WaterGlass si propone con i suoi leggerissimi 'pixel' di vetro, tagliati con precisione millimetrica e montati su rete secondo sequenze cromatiche ogni volta diverse, personalizzabili. Tutto è legato al patrimonio di ricerca e sperimentazione dell'azienda: tecnologie d'avanguardia e materiali di alta qualità firmano WaterGlass, e non solo.

Firmano da anni il successo mondiale di Sisis.

earth

Page 40

Page 94

Water

WaterGlass, liquid reflections

Transparency is the watchword. On seeing them, the effect is like crystal-clear, bright, light water. The color is not the main thing. They can be red as a ruby, green as an emerald or yellow as a topaz: the principal quality is always transparency, and that feeling of precious stones running through your fingers. "They" are the multi-colored tesserae from the WaterGlass collection which, through infinite combinations and decorations, can create environments that are intersected by light and the fluid reflections which inspire the entire collection.

A mosaic that can make entire structures water-like...

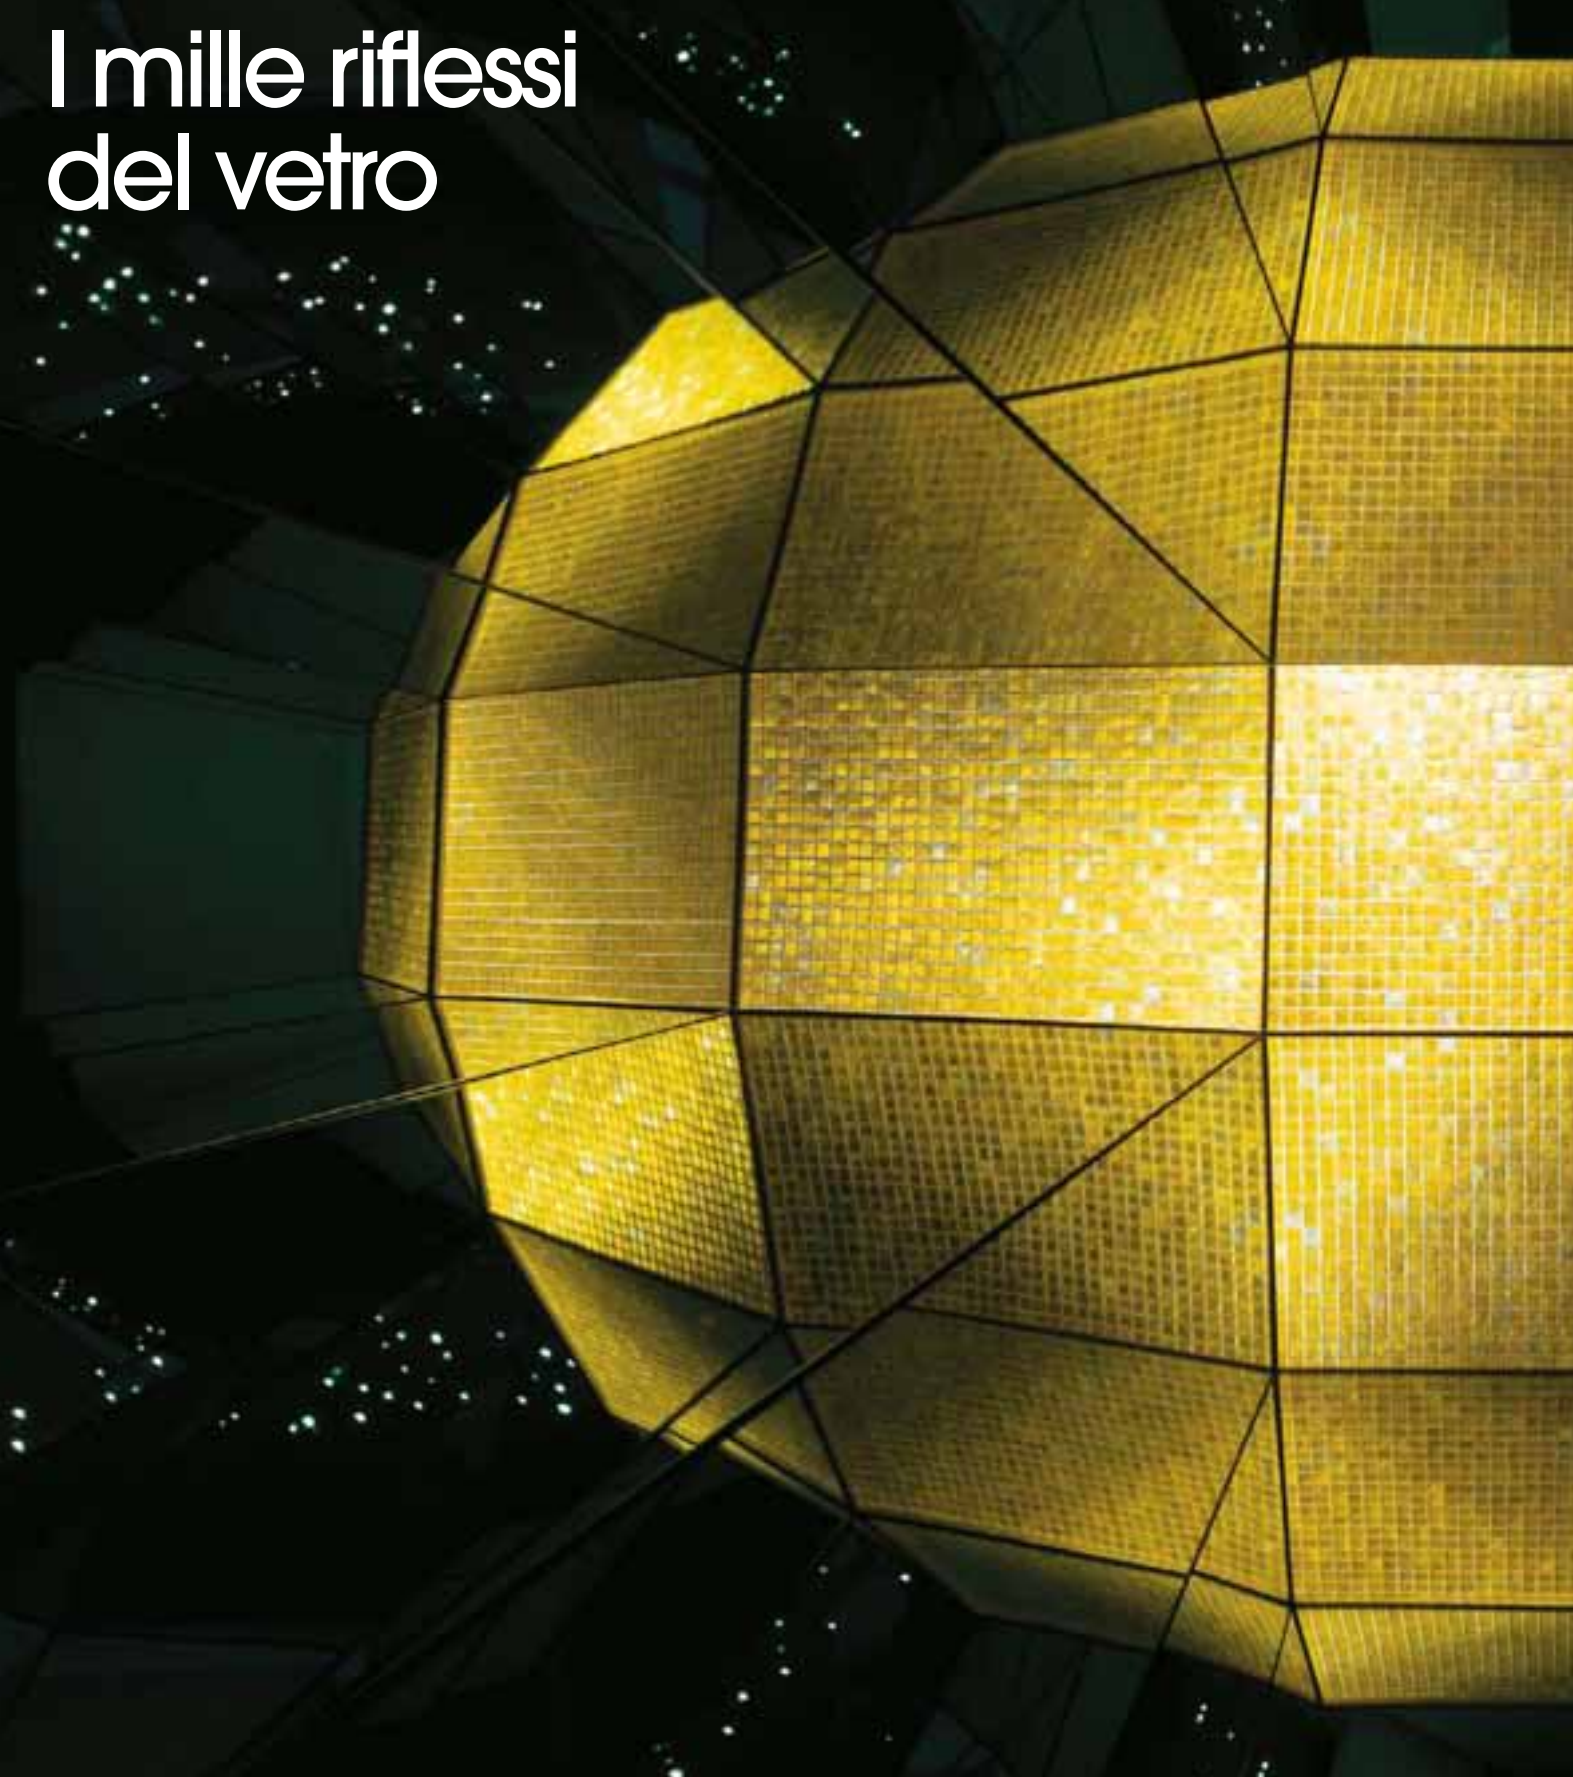

WaterGlass is formed of lightweight glass 'pixels', cut with mathematical precision and mounted on a mesh following individual, custom-designed chromatic sequences. And all is linked with the company's heritage of research and experimentation: state-of-the-art technology, top quality materials - and more - are behind WaterGlass. So has Sicis' worldwide success been determined for years.

WATERGLASS

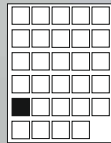

Acqua e vetro, un connubio perfetto, mille giochi di luce, rifrazioni di forme che cambiano ciò che vedi, che modificano la realtà, ed ogni tessera, sott'acqua, prende una vita propria, si modifica e si trasforma continuamente.

Water and glass, a perfect combination, thousands of lights, reflections of forms that change what we see, that modify the reality, and every mosaic chip, under water takes on a life of its own, continually changing and transforming.

IL PRODOTTO

Il vetro e la pasta di vetro sono prodotti antichissimi alla cui base stanno sostanze minerali naturali fuse ad altissima temperatura. Fra questi minerali, e sono anche fra i più pregiati, vengono utilizzati il Selenio ed il Cadmio la cui principale caratteristica è l'instabilità e la volatilità. Di contro si ottengono colori brillantissimi come il rosso ed il giallo. Senza una perfetta continuità tonale e costanza.

I colori al Selenio e al Cadmio sono: 2 Ale, 3 Amber, 5 Sundance, 7 Blush, 40 Crimson.

Tessere in vetro trasparente. Finitura della superficie semilucida.

La collezione, caratterizzata dalla trasparenza della materia e da studiate stonalizzazioni all'interno anche della stessa partita, è costituita da 29 colori.

APPLICAZIONI

Pavimenti interni: tutte le tipologie consentite dalla classe di resistenza di appartenenza.

Rivestimenti interni ed esterni: ogni tipo di rivestimento.

THE PRODUCT

The glass and glass paste are centuries-old products made of natural mineral substances, melted at very high temperatures. Among the most precious of these minerals are Selenium and Cadmium, the main characteristic of which is instability and volatility. On the other hand they also produce brilliant colours like red and yellow. Without perfect colour shad continuity and regularity.

The Selenium and Cadmium colors are the following: 2 Ale, 3 Amber, 5 Sundance, 7 Blush, 40 Crimson.

Transparent glass tesserae. Semi-gloss surface finish.

Range of 29 colours.

The collection is distinguished by the transparency of the material and by variegated discolouring inside the same lot.

APPLICATIONS

Interior floors: all types allowed by the relevant resistance class.

Interior and external wall facings: all types of wall facings.

DIMENSIONI E PESI

Formato tessera mm.	15x15 (5"/8" x 5"/8")
Montaggio	su carta, da rimuovere dopo la posa
Fuga di montaggio mm.	2
Formato foglio mm.	295x295 (+/- 1) - (12" x 12")
Tessere per foglio	324
Fogli per mq.	11 (mq. 0,96 - mq. nominale)
Fogli per scatola di cartone	22 (2 mq. nominali)
Scatole per bancale	30 (60 mq. nominali)
Peso Kg./mq.	6,5/7,5 (variabile per colore)

POSA E SIGILLATURA

Usare sempre collante bianco per evidenziare la trasparenza della materia e la profondità del colore. Una scheda tecnica di posa è contenuta in ogni scatola di materiale.

DATI TECNICI

Ricerca del piombo	assente
Assorbimento d'acqua (EN 99)	0,06 - 0,18
Resistenza dei colori alla luce (DIN 51094)	Resistente
Resistenza agli attacchi chimici della superficie (UNI EN ISO 10545-13 §8)	Classe HA (resistente)
Resistenza alle macchie (UNI EN ISO 10545-14)	Classe 5 (resistente)
Resistenza al gelo (UNI EN ISO 10545-12)	Resistente
Resistenza all'abrasione della superficie (ISO 10545-7)	PEI 5
Resistenza all'abrasione profonda (EN 102)	331*
Resistenza agli sbalzi termici (EN 104)	Resistente
Resistenza allo scivolamento (DIN 51130)	R 9
Resistenza allo scivolamento (DIN 51097)	Angolo di scivolam. >24° - campo applicazione A+B+C
Determinazione della scivolosità (Metodo B.C.R.)	Cuio/Superficie asciutta : 0,46
	Gomma/Superficie asciutta : 0,71
	Gomma/Sup.con acqua e agente bagnante: 0,63
	Superficie asciutta 0,60
	Superficie bagnata 0,58

piastrelle grès porcellanato Vm (mm3) 205; piastrelle di cotto Vm (mm3) 2365

DIMENSIONS AND WEIGHTS

Tessera size	5/8" x 5/8" (15 x 15 mm)
Installation	on paper to be removed after laying
Installation joint	2 mm
Sheet size	12" x 12" (+/- 1) (295x295 mm)
Tessera per sheet	324
Sheets per sqm.	11 (0.96 sqm - nominal sqm.)
Sheets per cardboard box	22 (2 nominal sqm)
Boxes per pallet	30 (60 nominal sqm)
Weight kg/sqm	6.5/7.5 (varies by colour)

LAYING AND SEALING

Always use white adhesive to highlight the transparency of the material and chromatic depth. Laying technical instruction sheets are contained in each box of material.

TECHNICAL SPECIFICATIONS

Lead research	Absent
Water absorption (EN 99)	0,06 - 0,18
Light fastness (DIN 51094)	Resistant
Surface resistance to chemical attack (UNI EN ISO 10545-13 §8)	Class HA (resistant)
Stain resistance (UNI EN ISO 10545-14)	Class 5 (resistant)
Frost resistance (UNI EN ISO 10545-12)	Resistant
Surface abrasion resistance (ISO 10545-7)	PEI 5
Deep abrasion resistance (EN 102)	331*
Resistance to heat fluctuations (EN 104)	Resistant
Slip resistance (DIN 51130)	R 9
Slip resistance (DIN 51097)	Sliding angle >24° - Application field A+B+C
Definition of slipperiness (B.C.R. Method)	Leather/Dry surface: 0,46
	Rubber/Dry surface: 0,71
	Rubber/Surface with water and wet agent: 0,63
	Dry surface 0,60
	Wet surface 0.58

Definition of the coefficient of static friction (ASTM C 1028-96)
